Latest Error

source: rendering library

RenderFlex children have non-zero flex but incoming height constraints are unbounded.

When a column is in a parent that does not provide a finite height constraint, for example if it is in a vertical scrollable, it will try to shrink-wrap its children along the vertical axis. Setting a flex on a child (e.g. using Expanded) indicates that the child is to expand to fill the remaining space in the vertical direction. These two directives are mutually exclusive. If a parent is to shrink-wrap its child, the child cannot simultaneously expand to fit its parent.

Consider setting mainAxisAlignment to MainAxisAlignment.min and using FlexFit.loose fits for the flexible children (using Flexible rather than Expanded). This will allow the flexible children to size themselves to less than the infinite remaining space they would otherwise be forced to take, and then will cause the RenderFlex to shrink-wrap the children rather than expanding to fit the maximum constraints provided by the parent. If this message did not help you determine the problem, consider using debugDumpRenderTree():

<https://flutter.dev/to/debug-render-layer>

<https://api.flutter.dev/flutter/rendering/debugDumpRenderTree.html>

The affected RenderFlex is:

```
RenderFlex#۸۱۷۳b relayoutBoundary=up۲۸ NEEDS-LAYOUT NEEDS-PAINT  
NEEDS-COMPOSITING-BITS-UPDATE(creator: Column ⚡ Semantics ⚡ _FocusInheritedScope ⚡ Focus ⚡  
CallbackShortcuts ⚡ Semantics ⚡ _FocusInheritedScope ⚡ Focus ⚡ BlocListener<DateMorooeHesabhaCubit,  
DateMorooeHesabhaState> ⚡ BlocBuilder<DateMorooeHesabhaCubit, DateMorooeHesabhaState> ⚡  
BlocConsumer<DateMorooeHesabhaCubit, DateMorooeHesabhaState> ⚡ _DateMorooeHesabhaBody ⚡⚡  
parentData: <none> (can use size), constraints: BoxConstraints(۰.۰<=w<=۱۵۹۲.۰, ۰.۰<=h<=Infinity), size:  
MISSING, direction: vertical, mainAxisAlignment: start, mainAxisSize: max, crossAxisAlignment: center,  
verticalDirection: down, spacing: ۰.۰)
```

The creator information is set to:

```
Column ⚡ Semantics ⚡ _FocusInheritedScope ⚡ Focus ⚡ CallbackShortcuts ⚡ Semantics ⚡  
_FocusInheritedScope ⚡ Focus ⚡ BlocListener<DateMorooeHesabhaCubit, DateMorooeHesabhaState> ⚡  
BlocBuilder<DateMorooeHesabhaCubit, DateMorooeHesabhaState> ⚡  
BlocConsumer<DateMorooeHesabhaCubit, DateMorooeHesabhaState> ⚡ _DateMorooeHesabhaBody ⚡⚡
```

The nearest ancestor providing an unbounded width constraint is: _RenderSingleChildViewport#009aY
relayoutBoundary=up23 NEEDS-LAYOUT:
needs compositing
