User Description

[Auto-sent] This report was generated and uploaded automatically after an error occurred.

Latest Error

source: Flutter framework
ListTile background color or ink splashes may be invisible.
The ListTile is wrapped in a DecoratedBox that has a background color. Because ListTile paints its background and ink splashes on the nearest Material ancestor, this DecoratedBox will hide those effects. To fix this, wrap the ListTile in its own Material widget, or remove the background color from the intermediate DecoratedBox.
